

Bring Your Own Device(BYOD)

- Does anyone have any form of BYOD initiative going on now?
- Do you KNOW the devices connected to your network and email server?

Of the 23 iPads, 13 were NOT company owned.

Of the 112 iPhones, about 25 are NOT company owned.

4 iPods??

- Do you plan to allow employees to manage their own devices and plans?
- Have more employees wanted to have their own device and be reimbursed through a stipend policy?
 - Data plans are getting cheaper and more people have smart phones
- Do you have a policy in place to specifically address personal devices?
- Do you have a mobile device management(MDM-the other MDM) system planned for this year or in the future?
 - Is it important to secure documents to the device?
- How do you think the BYOD movement will impact IT staff? Just another device to support?

Jackson Energy Authority
One thing you can count on.
